New Correctional Facility for Women Construction Update as of May 20, 2016

Our Department's head of Facilities is providing us with frequent project updates. Currently, we are completing week # 8 of the new Correctional Facility for Women construction. Concrete trucks continue to come in for pouring walls and footings and moving northward across the building footprint. The project remains on track and within budget. The installation of underground utilities kicked into high gear over the last week with additional trades now on site. There are numerous laborers and tradespeople on the project.

Visitors and staff are finding their way to the alternate parking areas across the street from the Prison. The existing SPU/Zone 7 parking area is on track to close on May 31st along with that section of the perimeter road. All staff and visitors for this unit will need to follow the signs and enter on the Palm Street side of the Prison in order to access the temporary parking area adjacent to the softball field.

In the next few weeks, we ask that all staff and visitors be mindful of the heavy construction equipment coming up Call Street and/or coming through the traffic light at McGuire Street, especially if you are walking or on a motor or pedal bike. There is still no blasting scheduled and the portable crushing is now complete. We look forward to providing additional updates and notices in the ensuing weeks.
